

Index - All M-Systems Research

#11.33 to 12.34

27th July 2021

Welcome to the last 102 entries on [Index – All M-Systems Research #11.32 to 12.34](#)

This is the document I created in 2016 to record new document titles.

Not all entries lead to an essay or book worth publishing, of the last 100 one in three perhaps. It is however useful, and in particular for myself, to reference what documents I planned to work on.

So here goes, starting with a classic,

1. **Chapter One: A zoom in on Š-RÉŠ™, ‘Let us call it Supereconomics’**

Doc Name: Chapter One - A zoom in on Š-RÉŠ™, ‘let us call it **Supereconomics**’ - 11.33 - v2.0 (10th October 2020)

10th October 2020 | *11.33 > 11.52 & 11.52b*

Nick Ray Ball

Apologies, I do not have time to complete this doc as I have done above. Which was to find, evaluate and run Grammarly over it, then make the pdf link and cater it on the spreadsheet.

So instead I'll just highlight the handful of works I know to be interesting and not already presented as part of a longer book. I'll highlight them in green.

Where I see a document that I know has already been presented, I will highlight it in a more vibrant green.

20. **S-RES--Financial-Engineering** - *'let us call it**Supereconomics'*

29th November 2020 | 11.58

Nick Ray Ball

Apologies again, and this maybe, just a little, explains why this project has so far taken 11 years when I come to a part of the story that is very cool but does not have a dedicated chapter.

And it took a long time to finish this doc, and even now it's not complete, but it is a start.

Because of the time taken on that doc, I no longer have time to complete this doc before the 1st of August, (Sienna's Angel Birthday).

I shall return to this doc in the future, for now, we can only see the document titles, which are nevertheless quite interesting and does give a summary of sorts of the last year.
